# Chapter 1

## Class Index

### 1.1 Class Hierarchy

This inheritance list is sorted roughly, but not completely, alphabetically:

BasisFunctions . . . . .	8
Diffusion . . . . .	10
Fokker_Planck . . . . .	16
Simple . . . . .	30
DMCparams . . . . .	13
ErrorEstimator . . . . .	13
Blocking . . . . .	8
SimpleVar . . . . .	30
GeneralParams . . . . .	16
Jastrow . . . . .	18
No_Jastrow . . . . .	21
Pade_Jastrow . . . . .	25
Minimizer . . . . .	19
ASGD . . . . .	6
MinimizerParams . . . . .	20
Orbitals . . . . .	22
AlphaHarmonicOscillator . . . . .	5
AlphaHarmonicOscillatorOld . . . . .	6
ExpandedBasis . . . . .	14
OutputHandler . . . . .	23
Distribution . . . . .	11
stdoutASGD . . . . .	31
stdoutDMC . . . . .	32
OutputParams . . . . .	24
ParParams . . . . .	25
Potential . . . . .	26
Coulomb . . . . .	10

Harmonic_osc . . . . .	17
QMC . . . . .	26
DMC . . . . .	12
VMC . . . . .	34
Sampling . . . . .	28
Brute_Force . . . . .	9
Importance . . . . .	18
STDOUT . . . . .	31
NO_STDOUT . . . . .	22
System . . . . .	32
Fermions . . . . .	15
SystemObjects . . . . .	33
VariationalParams . . . . .	34
VMCparams . . . . .	35
Walker . . . . .	35

## Chapter 3

# Class Documentation

### 3.1 AlphaHarmonicOscillator Class Reference

Inheritance diagram for AlphaHarmonicOscillator:

#### Public Member Functions

- **AlphaHarmonicOscillator** ([GeneralParams](#) &, [VariationalParams](#) &)
- **AlphaHarmonicOscillator** ([GeneralParams](#) &)
- virtual void **set\_qnum\_indie\_terms** (const [Walker](#) \*walker, int i)

#### Protected Member Functions

- virtual double **get\_variational\_derivative** (const [Walker](#) \*walker, int n)
- void **get\_qnums** ()
- double **H** (int n, double x) const
- virtual double **get\_parameter** (int n)
- virtual void **set\_parameter** (double parameter, int n)

#### Protected Attributes

- double \* **alpha**
- double \* **k**
- double \* **k2**

- double \* **w\_over\_a**
- double \* **exp\_factor**
- arma::Mat< int > **qnums**
- double **w**

### Friends

- class **ExpandedBasis**

The documentation for this class was generated from the following files:

- src/Orbitals/AlphaHarmonicOscillator/AlphaHarmonicOscillator.h
- src/Orbitals/AlphaHarmonicOscillator/AlphaHarmonicOscillator.cpp

## 3.2 AlphaHarmonicOscillatorOld Class Reference

Inheritance diagram for AlphaHarmonicOscillatorOld:

### Public Member Functions

- **AlphaHarmonicOscillatorOld** ([GeneralParams](#) &, [VariationalParams](#) &)

### Friends

- class **ExpandedBasis**

The documentation for this class was generated from the following files:

- src/Orbitals/AlphaHarmonicOscillatorOld/AlphaHarmonicOscillatorOld.h
- src/Orbitals/AlphaHarmonicOscillatorOld/AlphaHarmonicOscillatorOld.cpp

## 3.3 ASGD Class Reference

Inheritance diagram for ASGD:

### Public Member Functions

- **ASGD** ([VMC](#) \*, [MinimizerParams](#) &, const [ParParams](#) &)
- virtual [VMC](#) \* **minimize** ()

### Protected Member Functions

- void **get\_total\_grad** ()
- virtual void **update\_parameters** ()
- void **output\_cycle** ()
- void **thermalize\_walkers** ()
- double **f** (double x)
- void **get\_variational\_gradients** ([Walker](#) \*walker, double e\_local)

### Protected Attributes

- int **n\_c**
- int **n\_c\_SGD**
- int **SGDsamples**
- int **n\_walkers**
- int **thermalization**
- int **sample**
- double **t\_prev**
- double **t**
- double **step**
- double **max\_step**
- double **E**
- double **a**
- double **A**
- double **f\_min**
- double **f\_max**
- double **w**
- [Walker](#) \*\* **walkers**
- [Walker](#) \*\* **trial\_walkers**
- arma::rowvec **parameter**
- arma::rowvec **gradient**
- arma::rowvec **gradient\_local**
- arma::rowvec **gradient\_old**
- arma::rowvec **gradient\_tot**

## Friends

- class **stdoutASGD**

The documentation for this class was generated from the following files:

- src/Minimizer/ASGD/ASGD.h
- src/Minimizer/ASGD/ASGD.cpp

## 3.4 BasisFunctions Class Reference

### Public Member Functions

- virtual double **eval** (const [Walker](#) \*walker, int i)=0

The documentation for this class was generated from the following files:

- src/BasisFunctions/BasisFunctions.h
- src/BasisFunctions/BasisFunctions.cpp

## 3.5 Blocking Class Reference

Inheritance diagram for Blocking:

### Public Member Functions

- **Blocking** (int n\_c, [ParParams](#) &pp, std::string filename="blocking\_out", std::string path=".", int n\_b=100, int maxb=10000, int minb=10, bool rerun=false)
- **Blocking** (int n\_c, std::string filename="blocking\_out", std::string path=".", int n\_b=100, int maxb=10000, int minb=10)
- double **estimate\_error** ()
- void **get\_initial\_error** ()
- void **get\_unique\_blocks** (arma::Row< int > &block\_sizes, int &n)

### Protected Member Functions

- void **block\_data** (int block\_size, double &var, double &mean)

### Protected Attributes

- arma::rowvec **local\_block**
- int **min\_block\_size**
- int **max\_block\_size**
- int **n\_block\_samples**

The documentation for this class was generated from the following files:

- src/ErrorEstimator/Blocking/Blocking.h
- src/ErrorEstimator/Blocking/Blocking.cpp

## 3.6 Brute\_Force Class Reference

Inheritance diagram for Brute\_Force:

### Public Member Functions

- **Brute\_Force** ([GeneralParams](#) &)
- void **update\_walker** ([Walker](#) \*walker\_pre, const [Walker](#) \*walker\_post, int particle) const
- virtual void **get\_necessities** ([Walker](#) \*walker)
- virtual void **update\_necessities** (const [Walker](#) \*walker\_pre, [Walker](#) \*walker\_post, int particle) const
- virtual void **calculate\_energy\_necessities** ([Walker](#) \*walker) const
- virtual void **copy\_walker** (const [Walker](#) \*parent, [Walker](#) \*child) const
- virtual void **reset\_walker** (const [Walker](#) \*walker\_pre, [Walker](#) \*walker\_post, int particle) const

The documentation for this class was generated from the following files:

- src/Sampling/Brute\_Force/Brute\_Force.h
- src/Sampling/Brute\_Force/Brute\_Force.cpp

### 3.7 Coulomb Class Reference

Inheritance diagram for Coulomb:

#### Public Member Functions

- **Coulomb** ([GeneralParams](#) &)
- virtual double **get\_pot\_E** (const [Walker](#) \*walker) const

The documentation for this class was generated from the following files:

- src/Potential/Coulomb/Coulomb.h
- src/Potential/Coulomb/Coulomb.cpp

### 3.8 Diffusion Class Reference

Inheritance diagram for Diffusion:

#### Public Member Functions

- **Diffusion** (int n\_p, int dim, double timestep, long random\_seed, double D)
- double **ran2** (long \*idum)
- double **gaussian\_deviate** (long \*idum)
- virtual double **get\_new\_pos** (const [Walker](#) \*walker, int i, int j)
- virtual double **get\_g\_ratio** (const [Walker](#) \*walker\_post, const [Walker](#) \*walker\_pre) const =0
- double **get\_GBfunc** (double E\_x, double E\_y, double E\_T) const
- double **call\_RNG** ()
- void **set\_qmc\_ptr** ([QMC](#) \*qmc)
- void **set\_dt** (double dt)
- double **get\_dt** () const

### Protected Attributes

- int **n\_p**
- int **dim**
- **QMC** \* **qmc**
- double **timestep**
- double **D**
- long **random\_seed**
- double **std**

The documentation for this class was generated from the following files:

- src/Diffusion/Diffusion.h
- src/Diffusion/Diffusion.cpp

## 3.9 Distribution Class Reference

Inheritance diagram for Distribution:

### Public Member Functions

- **Distribution** (**ParParams** &, std::string filename="dist\_out", std::string path=".")
- virtual void **dump** ()

### Protected Attributes

- int **i**

The documentation for this class was generated from the following files:

- src/OutputHandler/Distribution/Distribution.h
- src/OutputHandler/Distribution/Distribution.cpp

### 3.10 DMC Class Reference

Inheritance diagram for DMC:

#### Public Member Functions

- **DMC** ([GeneralParams](#) &, [DMCparams](#) &, [SystemObjects](#) &, [ParParams](#) &)
- virtual void **run\_method** ()
- virtual void **output** ()

#### Static Public Attributes

- static const int **K** = 2

#### Protected Member Functions

- void **initialize** ()
- virtual bool **move\_authorized** (double A)
- void **iterate\_walker** (int k, int n\_b=1, bool production=false)
- void **Evolve\_walker** (int k, double GB)
- void **bury\_the\_dead** ()
- void **update\_energies** ()
- void **reset\_parameters** ()
- virtual void **node\_comm** ()

#### Protected Attributes

- int **n\_w**
- int **n\_w\_last**
- int **deaths**
- int **block\_size**
- int **samples**
- double **dmc\_E**
- double **E\_T**
- double **E**
- bool **dist\_from\_file**
- std::string **dist\_in\_path**
- [Walker](#) \*\* **original\_walkers**
- [Walker](#) \* **trial\_walker**

### Friends

- class **stdoutDMC**

The documentation for this class was generated from the following files:

- src/QMC/DMC/DMC.h
- src/QMC/DMC/DMC.cpp

## 3.11 DMCparams Struct Reference

### Public Attributes

- int **n\_c**
- int **therm**
- int **n\_w**
- int **n\_b**
- double **dt**
- double **E\_T**
- bool **dist\_in**
- std::string **dist\_in\_path**

The documentation for this struct was generated from the following file:

- src/QMChheaders.h

## 3.12 ErrorEstimator Class Reference

Inheritance diagram for ErrorEstimator:

### Public Member Functions

- **ErrorEstimator** (int n\_c, std::string filename, std::string path, bool parallel, int node, int n\_nodes, bool rerun=false)
- double **combine\_variance** (double var, double mean=0)
- void **finalize** ()
- void **node\_comm\_gather\_data** ()

- void **node\_comm\_scatter\_data** ()
- void **init\_file** ()
- virtual double **estimate\_error** ()=0
- void **normalize** ()
- virtual void **update\_data** (double val)
- void **clear** ()

### Public Attributes

- bool **data\_to\_file**
- bool **output\_to\_file**

### Protected Attributes

- int **n\_c**
- int **i**
- bool **parallel**
- bool **is\_master**
- int **node**
- int **n\_nodes**
- bool **rerun**
- std::string **filename**
- std::string **path**
- std::ofstream **file**
- arma::rowvec **data**

The documentation for this class was generated from the following files:

- src/ErrorEstimator/ErrorEstimator.h
- src/ErrorEstimator/ErrorEstimator.cpp

## 3.13 ExpandedBasis Class Reference

Inheritance diagram for ExpandedBasis:

### Public Member Functions

- **ExpandedBasis** ([GeneralParams](#) &gp, [Orbitals](#) \*basis, int m, std::string coeff-Path)
- virtual double **phi** (const [Walker](#) \*walker, int particle, int q\_num)
- virtual double **del\_phi** (const [Walker](#) \*walker, int particle, int q\_num, int d)
- virtual double **lapl\_phi** (const [Walker](#) \*walker, int particle, int q\_num)

### Protected Attributes

- int **basis\_size**
- arma::mat **coeffs**
- [Orbitals](#) \* **basis**

The documentation for this class was generated from the following files:

- src/Orbitals/ExpandedBasis/ExpandedBasis.h
- src/Orbitals/ExpandedBasis/ExpandedBasis.cpp

## 3.14 Fermions Class Reference

Inheritance diagram for Fermions:

### Public Member Functions

- **Fermions** ([GeneralParams](#) &, [Orbitals](#) \*)
- virtual void **get\_spatial\_grad** ([Walker](#) \*walker, int particle) const
- virtual void **get\_spatial\_grad\_full** ([Walker](#) \*walker) const
- virtual double **get\_spatial\_ratio** (const [Walker](#) \*walker\_post, const [Walker](#) \*walker\_pre, int particle) const
- virtual double **get\_spatial\_lapl\_sum** (const [Walker](#) \*walker) const
- virtual void **copy\_walker** (const [Walker](#) \*parent, [Walker](#) \*child) const
- void **update\_walker** ([Walker](#) \*walker\_pre, const [Walker](#) \*walker\_post, int particle) const
- virtual void **reset\_walker** (const [Walker](#) \*walker\_pre, [Walker](#) \*walker\_post, int particle) const
- virtual double **get\_spatial\_wf** (const [Walker](#) \*walker)
- virtual void **initialize** ([Walker](#) \*walker)
- virtual void **calc\_for\_newpos** (const [Walker](#) \*walker\_old, [Walker](#) \*walker\_new, int i)

### Protected Member Functions

- void **make\_merged\_inv** ([Walker](#) \*walker)
- void **update\_inverse** (const [Walker](#) \*walker\_old, [Walker](#) \*walker\_new, int particle)

### Protected Attributes

- arma::rowvec **I**

The documentation for this class was generated from the following files:

- src/System/Fermions/Fermions.h
- src/System/Fermions/Fermions.cpp

## 3.15 Fokker\_Planck Class Reference

Inheritance diagram for Fokker\_Planck:

### Public Member Functions

- **Fokker\_Planck** (int n\_p, int dim, double timestep, long random\_seed, double D=0.5)
- virtual double **get\_g\_ratio** (const [Walker](#) \*walker\_post, const [Walker](#) \*walker\_pre) const
- virtual double **get\_new\_pos** (const [Walker](#) \*walker, int i, int j)

The documentation for this class was generated from the following files:

- src/Diffusion/Fokker\_Planck/Fokker\_Planck.h
- src/Diffusion/Fokker\_Planck/Fokker\_Planck.cpp

## 3.16 GeneralParams Struct Reference

### Public Attributes

- int **n\_p**

- int **dim**
- long **random\_seed**
- double **D**
- double **h**
- double **w**
- bool **doMIN**
- bool **doVMC**
- bool **doDMC**
- bool **estimate\_error**
- bool **use\_jastrow**
- bool **use\_coulomb**
- std::string **system**
- std::string **sampling**

The documentation for this struct was generated from the following file:

- src/QMheaders.h

## 3.17 Harmonic\_osc Class Reference

Inheritance diagram for Harmonic\_osc:

### Public Member Functions

- **Harmonic\_osc** ([GeneralParams](#) &)
- virtual double **get\_pot\_E** (const [Walker](#) \*walker) const

### Protected Attributes

- double **w**

The documentation for this class was generated from the following files:

- src/Potential/Harmonic\_osc/Harmonic\_osc.h
- src/Potential/Harmonic\_osc/Harmonic\_osc.cpp

### 3.18 Importance Class Reference

Inheritance diagram for Importance:

#### Public Member Functions

- **Importance** ([GeneralParams](#) &)
- void **update\_walker** ([Walker](#) \*walker\_pre, const [Walker](#) \*walker\_post, int particle) const
- virtual void **get\_necessities** ([Walker](#) \*walker)
- virtual void **update\_necessities** (const [Walker](#) \*walker\_pre, [Walker](#) \*walker\_post, int particle) const
- virtual void **calculate\_energy\_necessities** ([Walker](#) \*walker) const
- virtual void **copy\_walker** (const [Walker](#) \*parent, [Walker](#) \*child) const
- virtual void **reset\_walker** (const [Walker](#) \*walker\_pre, [Walker](#) \*walker\_post, int particle) const

The documentation for this class was generated from the following files:

- src/Sampling/Importance/Importance.h
- src/Sampling/Importance/Importance.cpp

### 3.19 Jastrow Class Reference

Inheritance diagram for Jastrow:

#### Public Member Functions

- **Jastrow** (int n\_p, int dim)
- virtual void **initialize** ()=0
- virtual double **get\_val** (const [Walker](#) \*walker) const =0

- virtual double **get\_j\_ratio** (const Walker \*walker\_new, const Walker \*walker\_old, int i) const =0
- virtual void **get\_grad** (Walker \*walker) const =0
- virtual void **get\_grad** (const Walker \*walker\_pre, Walker \*walker\_post, int i) const =0
- virtual void **get\_dJ\_matrix** (Walker \*walker, int i) const =0
- void **get\_dJ\_matrix** (Walker \*walker) const
- virtual double **get\_lapl\_sum** (const Walker \*walker) const =0

### Protected Member Functions

- virtual double **get\_parameter** (int n)=0
- virtual void **set\_parameter** (double param, int n)=0
- virtual double **get\_variational\_derivative** (const Walker \*walker, int n)

### Protected Attributes

- int **n\_p**
- int **n2**
- int **dim**
- bool **active**

### Friends

- class **Minimizer**
- class **ASGD**
- class **stdoutASGD**

The documentation for this class was generated from the following files:

- src/Jastrow/Jastrow.h
- src/Jastrow/Jastrow.cpp

## 3.20 Minimizer Class Reference

Inheritance diagram for Minimizer:

### Public Member Functions

- **Minimizer** (**VMC** \*vmc, const **ParParams** &, const arma::rowvec &alpha, const arma::rowvec &beta)
- void **add\_output** (**OutputHandler** \*output\_handler)
- **Orbitals** \* **get\_orbitals** ()
- **Jastrow** \* **get\_jastrow** ()
- virtual **VMC** \* **minimize** ()=0
- void **output** (std::string message, double number=-1)
- void **add\_error\_estimator** (**ErrorEstimator** \*error\_estimator)

### Protected Member Functions

- void **dump\_output** ()
- void **finalize\_output** ()
- void **error\_output** ()
- virtual void **update\_parameters** ()=0

### Protected Attributes

- int **n\_nodes**
- bool **is\_master**
- **VMC** \* **vmc**
- **STDOUT** \* **std\_out**
- std::stringstream **s**
- int **Nspatial\_params**
- int **Njastrow\_params**
- int **Nparams**
- std::vector< **OutputHandler** \* > **output\_handler**
- std::vector< **ErrorEstimator** \* > **error\_estimators**

The documentation for this class was generated from the following files:

- src/Minimizer/Minimizer.h
- src/Minimizer/Minimizer.cpp

## 3.21 MinimizerParams Struct Reference

### Public Attributes

- double **max\_step**
- double **f\_max**
- double **f\_min**
- double **omega**

- double **A**
- double **a**
- int **SGDsamples**
- int **n\_walkers**
- int **thermalization**
- int **n\_cm**
- int **n\_c\_SGD**
- arma::rowvec **alpha**
- arma::rowvec **beta**

The documentation for this struct was generated from the following file:

- src/QMHeaders.h

## 3.22 No\_Jastrow Class Reference

Inheritance diagram for No\_Jastrow:

### Public Member Functions

- virtual void **get\_grad** ([Walker](#) \*walker) const
- virtual void **get\_grad** (const [Walker](#) \*walker\_pre, [Walker](#) \*walker\_post, int i) const
- virtual void **initialize** ()
- virtual void **get\_dJ\_matrix** ([Walker](#) \*walker, int i) const
- virtual double **get\_j\_ratio** (const [Walker](#) \*walker\_post, const [Walker](#) \*walker\_pre, int i) const
- virtual double **get\_val** (const [Walker](#) \*walker) const
- virtual double **get\_lapl\_sum** (const [Walker](#) \*walker) const

### Protected Member Functions

- virtual double **get\_parameter** (int n)
- virtual void **set\_parameter** (double param, int n)
- virtual double **get\_variational\_derivative** (const [Walker](#) \*walker, int n)

The documentation for this class was generated from the following files:

- src/Jastrow/No\_Jastrow/No\_Jastrow.h
- src/Jastrow/No\_Jastrow/No\_Jastrow.cpp

### 3.23 NO\_STDOUT Class Reference

Inheritance diagram for NO\_STDOUT:

#### Public Member Functions

- virtual void **cout** (std::stringstream &a)

The documentation for this class was generated from the following file:

- src/QMChheaders.h

### 3.24 Orbitals Class Reference

Inheritance diagram for Orbitals:

#### Public Member Functions

- **Orbitals** (int n\_p, int dim)
- virtual void **set\_qnum\_indie\_terms** (const Walker \*walker, int i)
- virtual double **phi** (const Walker \*walker, int particle, int q\_num)
- virtual double **del\_phi** (const Walker \*walker, int particle, int q\_num, int d)
- virtual double **lapl\_phi** (const Walker \*walker, int particle, int q\_num)
- void **set\_qmc\_ptr** (QMC \*qmc)

#### Protected Member Functions

- virtual double **get\_parameter** (int n)=0
- virtual void **set\_parameter** (double parameter, int n)=0
- virtual double **get\_variational\_derivative** (const Walker \*walker, int n)
- double **num\_diff** (const Walker \*walker, int particle, int q\_num, int d)
- double **num\_ddiff** (const Walker \*walker, int particle, int q\_num)

### Protected Attributes

- int **n\_p**
- int **n2**
- int **dim**
- int **max\_implemented**
- [QMC](#) \* **qmc**
- double **h**
- double **h2**
- double **two\_h**
- [BasisFunctions](#) \*\* **basis\_functions**
- [BasisFunctions](#) \*\*\* **dell\_basis\_functions**
- [BasisFunctions](#) \*\* **lapl\_basis\_functions**

### Friends

- class **Minimizer**
- class **ASGD**
- class **stdoutASGD**

The documentation for this class was generated from the following files:

- src/Orbitals/Orbitals.h
- src/Orbitals/Orbitals.cpp

## 3.25 OutputHandler Class Reference

Inheritance diagram for OutputHandler:

### Public Member Functions

- **OutputHandler** (std::string filename, std::string path, bool parallel, int node, int n\_nodes)
- virtual void **dump** ()=0
- virtual void **finalize** ()
- void **set\_qmc\_ptr** ([QMC](#) \*qmc)
- void **set\_min\_ptr** ([Minimizer](#) \*min)

### Protected Member Functions

- void **init\_file** ()

### Protected Attributes

- bool **is\_vmc**
- bool **is\_dmc**
- bool **is\_ASGD**
- bool **parallel**
- int **node**
- int **n\_nodes**
- bool **use\_file**
- std::stringstream **s**
- std::string **filename**
- std::string **path**
- std::ofstream **file**
- [QMC](#) \* **qmc**
- [DMC](#) \* **dmc**
- [VMC](#) \* **vmc**
- [Minimizer](#) \* **min**
- [ASGD](#) \* **asgd**

The documentation for this class was generated from the following files:

- src/OutputHandler/OutputHandler.h
- src/OutputHandler/OutputHandler.cpp

## 3.26 OutputParams Struct Reference

### Public Attributes

- bool **dist\_out**
- bool **blocking\_out**
- bool **dmc\_out**
- bool **ASGD\_out**
- std::string **outputSuffix**
- std::string **outputPath**

The documentation for this struct was generated from the following file:

- src/QMChaders.h

## 3.27 Pade\_Jastrow Class Reference

Inheritance diagram for Pade\_Jastrow:

### Public Member Functions

- **Pade\_Jastrow** ([GeneralParams](#) &, [VariationalParams](#) &)
- virtual void **initialize** ()
- virtual void **get\_grad** ([Walker](#) \*walker) const
- virtual void **get\_grad** (const [Walker](#) \*walker\_pre, [Walker](#) \*walker\_post, int i) const
- virtual void **get\_dJ\_matrix** ([Walker](#) \*walker, int i) const
- virtual double **get\_j\_ratio** (const [Walker](#) \*walker\_new, const [Walker](#) \*walker\_old, int i) const
- virtual double **get\_val** (const [Walker](#) \*walker) const
- virtual double **get\_lapl\_sum** (const [Walker](#) \*walker) const

### Protected Member Functions

- virtual double **get\_variational\_derivative** (const [Walker](#) \*walker, int n)
- virtual void **set\_parameter** (double param, int n)
- virtual double **get\_parameter** (int n)

### Protected Attributes

- double **beta**
- arma::mat **a**

The documentation for this class was generated from the following files:

- src/Jastrow/Pade\_Jastrow/Pade\_Jastrow.h
- src/Jastrow/Pade\_Jastrow/Pade\_Jastrow.cpp

## 3.28 ParParams Struct Reference

### Public Attributes

- bool **parallel**

- bool **is\_master**
- int **n\_nodes**
- int **node**

The documentation for this struct was generated from the following file:

- src/QMChaders.h

### 3.29 Potential Class Reference

Inheritance diagram for Potential:

#### Public Member Functions

- **Potential** (int n\_p, int dim)
- virtual double **get\_pot\_E** (const [Walker](#) \*walker) const =0

#### Protected Attributes

- int **n\_p**
- int **dim**

The documentation for this class was generated from the following files:

- src/Potential/Potential.h
- src/Potential/Potential.cpp

### 3.30 QMC Class Reference

The [QMC](#) superduper class!

Inheritance diagram for QMC:

### Public Member Functions

- **QMC** (int n\_p, int dim, int n\_c, [SystemObjects](#) &, [ParParams](#) &)
- void **add\_output** ([OutputHandler](#) \*output\_handler)
- virtual void **run\_method** ()=0
- virtual void **output** ()=0
- double **get\_KE** (const [Walker](#) \*walker) const
- void **get\_QF** ([Walker](#) \*walker) const
- void **get\_gradients** (const [Walker](#) \*walker\_pre, [Walker](#) \*walker\_post, int particle) const
- void **get\_gradients** ([Walker](#) \*walker) const
- void **get\_laplsum** ([Walker](#) \*walker) const
- double **get\_wf\_value** ([Walker](#) \*walker) const
- double **calculate\_local\_energy** (const [Walker](#) \*walker) const
- [System](#) \* **get\_system\_ptr** () const
- [Sampling](#) \* **get\_sampling\_ptr** () const
- [Jastrow](#) \* **get\_jastrow\_ptr** () const
- [Orbitals](#) \* **get\_orbitals\_ptr** () const
- double **get\_accepted\_ratio** (int total\_cycles) const
- void **set\_error\_estimator** ([ErrorEstimator](#) \*error\_estimator)

### Protected Member Functions

- virtual void **node\_comm** ()=0
- virtual void **initialize** ()=0
- virtual bool **move\_authorized** (double A)=0
- void **dump\_output** ()
- void **finalize\_output** ()
- void **diffuse\_walker** ([Walker](#) \*original, [Walker](#) \*trial)
- double **get\_acceptance\_ratio** (const [Walker](#) \*walker\_pre, const [Walker](#) \*walker\_post, int particle) const
- void **set\_spin\_state** (int particle) const
- bool **metropolis\_test** (double A)
- void **update\_walker** ([Walker](#) \*walker\_pre, const [Walker](#) \*walker\_post, int particle) const
- void **reset\_walker** (const [Walker](#) \*walker\_pre, [Walker](#) \*walker\_post, int particle) const
- void **copy\_walker** (const [Walker](#) \*parent, [Walker](#) \*child) const
- void **calculate\_energy\_necessities** ([Walker](#) \*walker) const
- void **estimate\_error** () const

### Protected Attributes

- `STDOUT` \* `std_out`
- `std::stringstream` `s`  
*This stream is awesome!*
- `bool` `is_master`
- `bool` `parallel`
- `int` `node`
- `int` `n_nodes`
- `int` `n_c`
- `int` `n_p`
- `int` `n2`
- `int` `dim`
- `int` `cycle`
- `int` `accepted`
- `int` `thermalization`
- `double` `local_E`
- `Jastrow` \* `jastrow`
- `Sampling` \* `sampling`
- `System` \* `system`
- `ErrorEstimator` \* `error_estimator`
- `std::vector< OutputHandler * >` `output_handler`

#### 3.30.1 Detailed Description

The `QMC` superduper class!

This class is so cool!

The documentation for this class was generated from the following files:

- `src/QMC/QMC.h`
- `src/QMC/QMC.cpp`

### 3.31 Sampling Class Reference

Inheritance diagram for Sampling:

### Public Member Functions

- **Sampling** (int n\_p, int dim)
- void **update\_pos** (const [Walker](#) \*walker\_pre, [Walker](#) \*walker\_post, int particle) const
- virtual void **update\_necessities** (const [Walker](#) \*walker\_pre, [Walker](#) \*walker\_post, int particle) const =0
- virtual void **update\_walker** ([Walker](#) \*walker\_pre, const [Walker](#) \*walker\_post, int particle) const =0
- void **set\_trial\_pos** ([Walker](#) \*walker, bool set\_pos=true)
- void **set\_trial\_states** ([Walker](#) \*walker)
- virtual void **get\_necessities** ([Walker](#) \*walker)=0
- virtual void **calculate\_energy\_necessities** ([Walker](#) \*walker) const =0
- virtual void **copy\_walker** (const [Walker](#) \*parent, [Walker](#) \*child) const =0
- virtual void **reset\_walker** (const [Walker](#) \*walker\_pre, [Walker](#) \*walker\_post, int particle) const =0
- virtual double **get\_g\_ratio** (const [Walker](#) \*walker\_post, const [Walker](#) \*walker\_pre) const
- double **get\_branching\_Gfunc** (double E\_x, double E\_y, double E\_T) const
- double **get\_spatialjast\_ratio** (const [Walker](#) \*walker\_post, const [Walker](#) \*walker\_pre, int particle) const
- void **set\_qmc\_ptr** ([QMC](#) \*qmc)
- void **set\_dt** (double dt)
- double **get\_dt** () const
- double **call\_RNG** ()
- void **set\_spin\_state** (int start, int end)

### Protected Attributes

- int **n\_p**
- int **n2**
- int **dim**
- int **start**
- int **end**
- [Diffusion](#) \* **diffusion**
- [QMC](#) \* **qmc**

The documentation for this class was generated from the following files:

- src/Sampling/Sampling.h
- src/Sampling/Sampling.cpp

### 3.32 Simple Class Reference

Inheritance diagram for Simple:

#### Public Member Functions

- **Simple** (int n\_p, int dim, double timestep, long random\_seed, double D=0.5)
- virtual double **get\_new\_pos** (const Walker \*walker, int i, int j)
- virtual double **get\_g\_ratio** (const Walker \*walker\_post, const Walker \*walker\_pre) const

The documentation for this class was generated from the following files:

- src/Diffusion/Simple/Simple.h
- src/Diffusion/Simple/Simple.cpp

### 3.33 SimpleVar Class Reference

Inheritance diagram for SimpleVar:

#### Public Member Functions

- **SimpleVar** (int n\_c, ParParams &)
- **SimpleVar** (int n\_c)
- double **estimate\_error** ()

#### Protected Attributes

- double **E**
- double **E2**

The documentation for this class was generated from the following files:

- src/ErrorEstimator/SimpleVar/SimpleVar.h
- src/ErrorEstimator/SimpleVar/SimpleVar.cpp

### 3.34 STDOUT Class Reference

Inheritance diagram for STDOUT:

#### Public Member Functions

- virtual void **cout** (std::stringstream &a)

The documentation for this class was generated from the following file:

- src/QMChheaders.h

### 3.35 stdoutASGD Class Reference

Inheritance diagram for stdoutASGD:

#### Public Member Functions

- **stdoutASGD** (std::string filename="ASGD\_out", std::string path=".")
- virtual void **dump** ()

The documentation for this class was generated from the following files:

- src/OutputHandler/stdoutASGD/stdoutASGD.h
- src/OutputHandler/stdoutASGD/stdoutASGD.cpp

### 3.36 stdoutDMC Class Reference

Inheritance diagram for stdoutDMC:

#### Public Member Functions

- **stdoutDMC** (std::string filename="DMC\_out", std::string path="/", bool parallel=false, int node=0, int n\_nodes=1)
- virtual void **dump** ()

#### Protected Attributes

- int **n**
- double **sumE**
- double **sumN**

The documentation for this class was generated from the following files:

- src/OutputHandler/stdoutDMC/stdoutDMC.h
- src/OutputHandler/stdoutDMC/stdoutDMC.cpp

### 3.37 System Class Reference

Inheritance diagram for System:

#### Public Member Functions

- **System** (int n\_p, int dim, [Orbitals](#) \*orbital)
- void **add\_potential** ([Potential](#) \*pot)
- double **get\_potential\_energy** (const [Walker](#) \*walker)

- virtual void **update\_walker** ([Walker](#) \*walker\_pre, const [Walker](#) \*walker\_post, int particle) const =0
- virtual void **calc\_for\_newpos** (const [Walker](#) \*walker\_old, [Walker](#) \*walker\_new, int particle)=0
- virtual double **get\_spatial\_ratio** (const [Walker](#) \*walker\_pre, const [Walker](#) \*walker\_post, int particle) const =0
- virtual double **get\_spatial\_wf** (const [Walker](#) \*walker)=0
- virtual void **get\_spatial\_grad** ([Walker](#) \*walker, int particle) const =0
- virtual void **get\_spatial\_grad\_full** ([Walker](#) \*walker) const =0
- virtual double **get\_spatial\_lapl\_sum** (const [Walker](#) \*walker) const =0
- virtual void **initialize** ([Walker](#) \*walker)=0
- virtual void **copy\_walker** (const [Walker](#) \*parent, [Walker](#) \*child) const =0
- virtual void **reset\_walker** (const [Walker](#) \*walker\_pre, [Walker](#) \*walker\_post, int particle) const =0
- [Orbitals](#) \* **get\_orbital\_ptr** ()
- void **set\_spin\_state** (int start, int end)

#### Protected Attributes

- int **n\_p**
- int **n2**
- int **dim**
- int **start**
- int **end**
- std::vector< [Potential](#) \* > **potentials**
- [Orbitals](#) \* **orbital**

The documentation for this class was generated from the following files:

- src/System/System.h
- src/System/System.cpp

## 3.38 SystemObjects Struct Reference

#### Public Attributes

- [Orbitals](#) \* **SP\_basis**
- [Potential](#) \* **onebody\_pot**
- [System](#) \* **SYSTEM**
- [Sampling](#) \* **sample\_method**
- [Jastrow](#) \* **jastrow**

The documentation for this struct was generated from the following file:

- src/QMChheaders.h

### 3.39 VariationalParams Struct Reference

#### Public Attributes

- double **alpha**
- double **beta**

The documentation for this struct was generated from the following file:

- src/QMChaders.h

### 3.40 VMC Class Reference

Inheritance diagram for VMC:

#### Public Member Functions

- **VMC** ([GeneralParams](#) &, [VMCparams](#) &, [SystemObjects](#) &, [ParParams](#) &)
- void **set\_e** (double E)
- double **get\_energy** () const
- virtual void **run\_method** ()
- virtual void **output** ()

#### Protected Member Functions

- virtual void **initialize** ()
- virtual bool **move\_authorized** (double A)
- void **scale\_values** ()
- virtual void **node\_comm** ()

#### Protected Attributes

- double **vmc\_E**
- [Walker](#) \* **original\_walker**
- [Walker](#) \* **trial\_walker**

### Friends

- class **Minimizer**
- class **ASGD**
- class **Distribution**
- class **BlockingData**

The documentation for this class was generated from the following files:

- src/QMC/VMC/VMC.h
- src/QMC/VMC/VMC.cpp

## 3.41 VMCparams Struct Reference

### Public Attributes

- int **n\_c**
- double **dt**

The documentation for this struct was generated from the following file:

- src/QMChheaders.h

## 3.42 Walker Class Reference

### Public Member Functions

- **Walker** (int n\_p, int dim, bool do\_init=true)
- void **calc\_r\_i2** (int i)
- void **calc\_r\_i2** ()
- double **abs\_relative** (int i, int j) const
- void **make\_rel\_matrix** ()
- double **get\_r\_i2** (int i) const
- void **kill** ()
- bool **is\_dead** ()
- bool **is\_alive** ()
- void **ressurrect** ()
- void **set\_E** (double E)
- double **get\_E** () const
- void **print** (std::string header="----")

### Public Attributes

- double **spatial\_ratio**
- double **value**
- double **lapl\_sum**
- double **E**
- arma::mat **r**
- arma::mat **r\_rel**
- arma::mat **qforce**
- arma::mat **spatial\_grad**
- arma::mat **jast\_grad**
- arma::mat **inv**
- arma::mat **phi**
- arma::field< arma::mat > **dell\_phi**
- arma::cube **dJ**
- arma::rowvec **r2**

### Protected Attributes

- int **n\_p**
- int **n2**
- int **dim**
- bool **is\_murdered**

The documentation for this class was generated from the following files:

- src/Walker/Walker.h
- src/Walker/Walker.cpp
